

## **What Is the Root Cause of Alzheimer Disease?**

### **The newest findings of American scientists**

At the end of 2010 an important news attracted the attention of the medical community and of many other people. Scientists from the USA discovered that **the Alzheimer disease occurs not because people produce excessive amounts of a certain protein, but because they cannot discharge of it.**

The results from a study conducted by a team from the George Washington University in Saint Luis will help **find an explanation for the accumulation of the beta-amyloid plaques.** Based on it the pharmaceutical companies are expected to develop new efficient drugs.

People suffering from Alzheimer disease have 100 to 1000 times more amyloid in their brain. Usually, this is beta-amyloid. Therefore, the scientists examined the mechanism it was produced by and discharged from the brain of 12 healthy and 12 sick people.

**There were not discovered differences in the level of the produced protein.** Nevertheless, the sick patients discharged the protein from their brain in a 30% slower rate. This means that **the disease starts at least 10 years before the appearance of the first symptoms.**

## **THE ENDLESS DECEPTIONS OF MEDICINE**

**In connection with the NEWS FROM THE END OF 2010** I would like to bring to mind **several news on the same topic** – about the etiology, origin, **root cause** of the Alzheimer syndrome, already **published** in the ‘Lechitel’ newspaper **A FEW YEARS AGO:**

### **I**

‘The most significant, the most popular, **the most crucial degenerative diseases causing over 90% of human mortality in the world:** diabetes, asthma, arthritis, artrosis, fibromyaglia, heart failure, atherosclerosis, arrhythmias, infarct, stroke, Hashimoto’s disease, scizophrenia, paranoia, chronic fatigue syndrome, Parkinson disease, **ALZHEIMER disease**, MS, most of the so called autoimmune, skin, rare,

some oncological and etc. 'diseases'. Add to these: ALS (**AMYOTROPHIC LATERAL SCLEROSIS**), tinnitus, systemic lupus erythematoses, sclerodermia, anemias, allergies, myasthenia gravis, Crohn's disease, Peyronie's disease, lymphomas and so forth. **This list for the time being includes some 127 diseases. They all originate PRIMARILY from unrecognized infectious etiologic factors and mainly from chronic Lyme disease (CLD).**"

*(From "Why Lyme Disease is the Greatest Health Problem of Humanity?" – a report, delivered at the 'Balkan Medical Congress' in Varna on 28-30 September 2006, and published in the "Lechitel' newspaper" – issue 40/2006, author: Atanas TSONKOV.)*

## II

"I have grounds to maintain that I know the root causes of **Alzheimer disease**" (it would be more accurate if for the time being this illness is referred to as a 'syndrome' and not as 'a disease!'), and they are unknown to the conventional (academic) medicine!...

The established by me **method of complex diagnosing** includes two original tests: **SIT** (Symptomatic Integral Test) and **LIT** (Laboratory Indirect Test).

...The application of these two tests allows for **adequate, etiological, and optimal** diagnosing and treating of millions of patients suffering from and dying of such 'untreatable' diseases as **diabetes (all three forms), cardio-vascular problems, MS, ALZHEIMER SYNDROME, fibromyalgia, rheumatoid polyarthritis, gout, Parkinson syndrome, AMYOTROPHIC LATERAL SCLEROSIS (ALS), schizophrenia, depressions, sight, hearing and/or thyroid gland problems, some oncologic diseases such as Hodgkin's disease and non-Hodgkin's disease, leukaemias, chronic fatigue syndrome...**"

*("Is Bush Ill?" – 'Lechitel' newspaper, issue 35/2007, author Atanas TSONKOV.)*

To this very day **academic medicine** has addressed the diagnoses in question as **idiopathic or only symptomatic – in other words of unknown root cause...**

...As strange as it may seem for the present day '**ABC book**' medical thinking, these and many other diseases are being caused **primarily** by unidentified **infectious** agents and in the first place by the **CHRONIC LYME INFECTION**, which is deprived, on a global scale, of **reliable, trustworthy, standardized** tools of diagnosing, except for the mentioned above SIT and LIT.

## III

## Unknown facts about the Alzheimer Disease

**First:** In scientific medicine are cited dozens of risk factors for the inception of the Alzheimer syndrome and of other similar pertaining to dementia conditions.

**For the time being there has not been detected a generally accepted one and only cause for the development of the ‘Alzheimer disease’.** There are listed many etiological root causes, such as heavy metals’ intoxication, mainly aluminum (especially in case of hemodialysis), cranial traumas, hereditary genes etc.

In reality, all these assertions and findings are disputable and contradict each other, being conditionally or relatively true. They expand in the sphere of hypotheses and probabilities. These conclusions lead to the impotence of orthodox medicine to offer efficient therapy to the suffering from Alzheimer patients.

**Second:** In 2005, aided by the established by him **Complex Method for Optimal Diagnosing**, the Medical Consultant of ‘Lechitel’ newspaper Atanas TSONKOV discovered that the condition specified as ‘Alzheimer disease’ (it is more correct to say ‘Alzheimer Syndrome’), is caused **most often** by unidentified chronic infections and chiefly by the **Lyme bacterial infection Borrelia burgdorferi**.

**Third:** Using the present day standard and generally accepted diagnostic tests (**Elisa, PCR, and Western Blot**), the chronic Lyme infection is detected in only **1-2 percents**, while Tsonkov’s method demonstrates its presence in **over 90%** of the cases.

This also provides relevant **opportunities for successful treatment of the Alzheimer sufferers**, at least in the first two stages of the disease. The treatment is carried out without any synthetic medicines, which are useless and harmful in this case.

**Fourth:** Through this message ‘Lechitel’ turns to **the inquisitive Bulgarian neurologists, psychiatrists and infectionists;** to **Mrs. Nancy Reagan**, to the American Ambassador to Bulgaria – **His Excellency Ambassador John Byerly**; as well as to those who are in contact with the mentioned above people – please cooperate in any way you can for the verification and eventual implementation of Atanas Tsonkov’s diagnostic and therapeutic method in the health practice.

We think that these methods and the attempts to treat patients with Alzheimer disease with stem cells do not contradict one another and can be combined to beneficially supplement one another in some cases.

Healer Tsonkov is ready to share, free of charge, his findings with interested,

competent and well-intentioned specialists. He is convinced that even now millions of people in the world can be protected from or get rid off this terrible suffering.

Please look forward to the latest more comprehensive post on the topic.

Contact Atanas Tsonkov at (003592) 953-27-45 (consultations are free of charge!).

If you write to us, the address is: Sofia 1606, 24, 'St. Ivan Rilski' St, Entr. B, Office 5, e-mail:[info@lechitel.bg](mailto:info@lechitel.bg) Please enclose a **copy** of all your examinations and medical specialist's report (in cases of diagnoses such as Alzheimer, Parkinson, MS, ALS, cortical atrophy, cerebrovascular disease, dementia, generalized atherosclerosis)."

#### IV

"In this country the people suffering from dementia are around **100 000**, and of them at least **50 000** suffer from the **ALZHEIMER SYNDROME...**

'Lechitel' has its own unique program for **adequate (etiologic) diagnosing and treatment** of people affected by the Alzheimer syndrome (regretfully, conventional medicine uses one, **symptomatic only** diagnosis!). Should Professor **LUCHEZAR TRAYKOV**, neurologist, director of the 'Alexandrovksa' University Hospital, specialist in Alzheimer's disease shows interest in the said in this message, they could write or contact us at **phone (00359 2) 953-27-45**. We offer cooperation and free of charge consultation that would be beneficial primarily to the sick and their relatives. (*"ALZHEIMER" - "Lechitel" newspaper, issue 38/2009*).

#### V

Please note, dear readers, that the American scientists **have not determined the cause of the amyloid plaques** that are assumed to cause... Alzheimer! These scientists have only concluded that the illness occurs due to the inability of the body to discharge itself of the plaques.

The scientists are planning to yet find 'an explanation for the accumulation of beta-amyloid plaques', and based on this inexistent now 'explanation', pharmacy is to develop new effective drugs (?!).

For the time being, the American 'discoverers' pick on the surface of the problem and

following the most popular and barren trend in present day mainstream medical science, they study not the root causes of this catastrophic illness, but rather their effects, signs and symptoms.

In reality, **the primary etiological factors** for the formation of beta-amyloid plaques can be detected, determined and attacked adequately a lot earlier – **some 10-20-30-40 and more years (!) before the plaques strike the brain cells** and the visible symptoms of Alzheimer appear.

**AND THESE PLAQUES ARE MOST OFTEN CAUSED BY CHRONIC INFECTIONS AND MAINLY BY THE CHRONIC LYME INFECTION**, as we have repeatedly written about this in the ‘Lechitel’ newspaper – in more details and more truthfully than in any other medical edition in the world!

Regretfully, the American researchers and their Bulgarian colleagues obviously do not read the ‘Lechitel’ newspaper or are led by unknown, yet obviously non-medical considerations, in order not to take the most selflessly extended to them hand.

Nor is there noticed any attempt to refute my substantiated allegations...?! It seems the health of the Alzheimer patients is not their most important goal! And they go on practicing ‘science’ for the sake of ‘science’ or for the sake of something else that is very far from medicine...

*Atanas TSONKOV*  
*Medical Consultant of the ‘Lechitel’ newspaper*

\* Please note that the meaning of ‘Lechitel’ is healer.
